The American Floating Offshore Wind Technical Summit

AFloat 2022 brings together leading offshore wind experts to address the drivers, challenges, and opportunities to prepare the U.S. for floating offshore wind. The agenda focuses on topics related to research and development, emerging technologies, permitting, and design to address drivers and challenges from a technical, regulatory, and permitting perspective. Existing and planned projects will be reviewed, including New England Aqua Ventus the country's first commercial-scale floating offshore wind project that will be deployed in the Gulf of Maine.

AFloat 2021 Highlights

500 + registrations

40 + companies

60 + speaker & panelists

Seize your opportunity to sponsor AFloat 2022.

Lobster Bake Sponsorship: \$5,000

(Two sponsorship packages available)

The lobster bake will be on Peaks Island, just a short 15-minute chartered ferry ride from Portland. The island is located in the heart of Casco Bay and boasts beautiful ocean views. It is the perfect location for a traditional Maine lobster dinner including lobster, mussels, corn on the cob, dinner roll, coleslaw, and drawn butter. A grilled chicken, steak, or vegetarian option is also available.

AFloat Lobster Bake Sponsorship Advantages

The sponsor(s) will get

- naming rights for presenting the dinner with the company name and logo included in invitations and promotional materials.
- On-site promotion opportunities include event signage and the host(s) to give brief welcome remarks to all attendees.
- The sponsor's logo will appear on slides shown during AFloat, including recognition as a sponsor and during the intermission slide show.
- The sponsor will get (2) AFloat 2022 registrations and (2) complimentary tickets to the lobster bake.

Floating Offshore Wind is Gaining Significant Momentum

The Gulf of Maine is poised to become the birthplace of the nation's floating offshore wind industry. New England Aqua Ventus will be the country's first commercial-scale floating offshore wind project, slated to be deployed in 2024 off the Maine coast. The State of Maine submitted an application to BOEM to lease a 15.2-square-mile area 30 miles offshore for the nation's first floating offshore wind research site in federal waters. To seize the opportunity, AFloat will address the technical, regulatory, and permitting challenges.
